

Use CAL-BASE in conjunction with BLOOM or GROW, at a rate of 1 part CAL-BASE to 2 parts GROW or BLOOM. Add CAL-BASE to water and mix until dissolved. Then add GROW or BLOOM and mix until dissolved. These charts display the E.C., pH

ALL MEASUREMENTS ARE GRAMS PER GAL of RO water

Soil Feed Chart / Hydro reduce by ¼

FEED CHART	cALBASE	gROW	bLOOM
Early Rooted Starts PH 5.7 EC .25	¼ Gram Per Gal	½ Gram Per Gal	¼ Gram Per Gal
Week 1-3 Bloom PH 6.2-6.3 EC 1.0	½ Gram Per Gal	¾ Gram Per Gal	1 Gram Per Gal
Week 4-7 BLOOM PH 6.5 EC 2.0	1 Gram Per Gal	2 Grams Per Gal	2 ½ Grams Per Gal
Week 8-10 BLOOM PH 6.3 EC 2.5	1 Gram Per Gal	1 ½ Grams Per Gal	3 Grams Per Gal

This feed chart is a recommended feed program, Results will vary the EC is with RO water, **REMEMBER LESS is MORE** Hygrowplex is a powerful nutrient line built for cannabis, you will have explosive results. You can run our full line by adding the recommended amount to this chart. Your PPM pen should have EC reading as well, switch to EC
